Introduction

Experienced and adaptable software developer with a strong background in full-stack development, specializing in PHP-based frameworks and modern JavaScript technologies. At INADEV Corporation, I focused on building robust web applications using CodeIgniter 3, React-native and Laravel. My tenure at ODZ enabled me to expand into eCommerce and modern web development, working with Shopify, Shopify Apps, Rest/Graphql API, Codeigniter, Wordpress, Node.js, and React.js. Earlier at Webastral, I honed my skills in a wide range of CMS platforms including WordPress, Drupal, and Prestashop. Proficient in management tools like Jira, Git, Slack, and Bitbucket, and deeply familiar with Agile methodologies, I bring a collaborative mindset and a passion for building efficient, user-centric solutions. I'm now seeking opportunities where I can contribute technical excellence and drive impactful digital experiences.

Area of Expertise

- PHP development with experience in Laravel 12 and CodeIgniter 3.
- CMS platforms: Shopify, Prestashop, WordPress, Drupal, Joomla and Opencart.
- JavaScript frameworks and libraries: React.js, Node.js, React Native.
- Agile methodology and Scrum-based team collaboration.
- Source control and DevOps tools: Git, Bitbucket.
- Project and task management: Jira, Slack.
- Integration of third-party APIs and services.
- Quick to adapt and contribute in both team-based and independent work environments.

Past Work Experience

Netprophets cyberworks pvt. ltd (FEB'2025 - Present)
Software Engineer (Laravel, React.js, mysql**)**

- Worked on JKBOPEE counseling and seat allotment module using SQL Server.
- Revamped the JKBOPEE website with Laravel and React.js, implementing JWT-based authentication for login and RESTful APIs for data retrieval.

Optimize IT Systems (MAY'2022 - OCT'2024)
Software Engineer (Codeigniter 3, React-native)
- Developed and maintained web applications using Laravel and CI3 frameworks.
- Created and deployed a cross-platform mobile application using React Native.
- Designed RESTful APIs and implemented secure, scalable backend systems.
- Followed Agile methodology for continuous delivery and iterative improvement.
- Utilized Google Chat, Gitlab and Jira for version control and team collaboration.

ODZ Services (Feb'2020 - May'2022)
Web Developer (Shopify, Codeigniter, Reactjs, Nodejs, Wordpress, Symphony based applications)
- Led eCommerce development using **Shopify** with custom/public apps, themes, and API integrations.
- Built dynamic front-ends with **React.js** and managed backend services using **Node.js**.
- Developed and enhanced applications in **WordPress**, **CodeIgniter 3**, and **Symfony** frameworks.
- Integrated and optimized custom solutions for multi-platform environments.
- Participated in sprint planning, code reviews, and team collaboration via **Git** and **Slack**.

Webastral (Mar'2017 - Jan'2020)
Web Developer (WordPress, Drupal, Prestashop, Opencart, Moodle, Shopify)
- Engineered and deployed customized CMS solutions across platforms such as WordPress, Drupal, Prestashop, and Opencart to meet diverse client needs.
- Developed and tailored themes, modules, and plugins to align with project specifications and enhance user engagement.
- Implemented responsive design principles to ensure optimal performance across all devices and screen sizes.
- Optimized websites for SEO and performance, ensuring fast load times and high search engine visibility.
- Ensured consistent functionality and design through rigorous cross-browser testing and debugging.

Additional Experience

Chalo Grocery (SEP'2024 - Feb'2025)
Freelance Web Developer (ReactNative, Nextjs, Reactjs, Nodejs mysql, otpless, MSG91, Razorpay)

- Designed, developed, and maintained both web and mobile applications to streamline business operations for Chalo Grocery.
- Built a responsive web platform and a cross-platform mobile app for product browsing, ordering, and inventory tracking.
- Implemented admin features for order management, customer data handling, and real-time updates.
- Ensured seamless integration between frontend interfaces and backend APIs, focusing on performance and scalability.
- Delivered end-to-end solutions including UI/UX design, development, deployment, and post-launch support.
