SUMMARY

With fluency in React, Redux, Express.js, Mongo.DB, Node.js JavaScript, Tailwind CSS, HTML, and CSS, along with around three years of experience at GlobalLogic, I've honed my skills as a dynamic Software Engineer. I possess a knack for developing intricate solutions, coupled with a strong inclination towards creative problem-solving, high energy, and unwavering integrity.

TECHNICAL SKILLS

Languages	: JavaScript, HTML, CSS
Frameworks	: Express.js, Node.js, Bootstrap, Tailwind
CSS Libraries	: React.js, MaterialUI, Redux, React Router
Databases	: MongoDB, MySQL
Dev Tools	: Visual Studio Code, Postman

EXPERIENCE

Senior Software Engineer — July 2022 – Present
Global Logic — *WFO - Gurugram, Haryana, India*

- I designed and implemented a polished user interface using **HTML, CSS, JavaScript, Express.js, Mongo.DB, Node.js and ReactJS** structured around components to efficiently showcase data extracted by automated processes. This approach maximized the presentation of data while enhancing user interaction seamlessly.
- I integrated Redux Toolkit as a state management solution, enhancing the data flow within the application. This implementation ensured smooth synchronization across various components, optimizing performance and user experience.
- I specialize in delivering projects with remarkably swift turnaround times, often within just 1-2 days or even hours. I've seamlessly integrated React's virtual rendering capabilities into my workflow, allowing for efficient development and rapid deployment of high-quality solutions.

Software Engineer — April 2022 – July2022
Cubastion Consulting — *WFO - Gurugram, Haryana, India*

- Contributed to the development of user interfaces using HTML, CSS, JavaScript, Node.js, Express.js, MongoDB, and ReactJS.
- Contributed to building and testing RESTful APIs with Node.js and Express.js.
- Gained hands-on experience in building responsive and interactive applications while working closely with senior developers.

Associate Software Engineer — March 2021 – April2022
Viraaj Venture — *WFO - Noida, UP, India*

- Developed a full-stack web application to manage client information, projects, and communications.
- Designed a responsive user interface using **React.js** and **Tailwind CSS** for an intuitive client dashboard.
- Added features like **client onboarding, project tracking, search & filter, and role-based access**.

EDUCATION

SGT University — Gurugram, Haryana, India
Bachelor of Technology in Computer Science — *2017 - 2021*

PROJECTS

News App — *React.js, Redux, Bootstrap, Node.js, Express.js*

- Created a responsive web application using **HTML, CSS, JavaScript and React.js** that aggregates and displays news articles from multiple sources.
- Integrated the NewsAPI to fetch and present up-to-date news articles with titles, descriptions, and publication dates.
- Implemented advanced features such as article categorization by topics, search functionality.

Weather App   *JavaScript and React.js*

- Designed and developed a responsive web application using React.js that provides real-time weather information for any location
- Integrated the OpenWeatherMap API to retrieve and display current weather conditions, temperature.

STRENGTHS

- Time Management
- Adaptability
- Punctuality

- Created a responsive web application using **HTML, CSS, JavaScript and React.js** that aggregates and displays news articles from multiple sources.
- Integrated the NewsAPI to fetch and present up-to-date news articles with titles, descriptions, and publication dates.
- Implemented advanced features such as article categorization by topics, search functionality.
